

JEVI AUSTIN
INTERNATIONAL CO. LTD

From Energy
to Engineering

**We Make
Systems Work.**

Our **Vision**

To become a recognized and highly respected name within its sectors of operation elevating the company to a position within the top performing indigenous companies in Nigeria and sub-shara Africa.

Our **Mission**

To achieve its vision by delivering quality services to oil and gas companies and government agencies in Nigeria, through a proactive, customer-focused approach that upholds the highest safety and security standards.

Our **Core Values**

Customer Focus – Prioritizing client needs through responsive and tailored solutions.

Quality Service – Commitment to excellence in all service delivery.

Proactivity – Anticipating and addressing challenges before they arise.

Safety – Upholding strict safety standards to protect people and assets.

About **Us**

JEVI Austin International Company Limited is a wholly indigenous company incorporated in Nigeria on June 15, 1995, under the Companies and Allied Matters Act (CAMA) of 1990. The company is duly registered with key government regulatory bodies, including the Nigerian Communications Commission (NCC), Nigerian Petroleum Exchange (NIPEX), Nigerian Content Development and Monitoring Board (NCDMB), Department of Petroleum Resources (DPR), and the Bureau of Public Procurement (BPP). Since its establishment, JEVI Austin International Company Limited has successfully executed numerous contracts and subcontracts awarded by reputable organizations across Nigeria.

ICT & Telecommunication

Electrical & Mechanical Engineering

Instrumentation & Control

Solar Energy

Fire & Gas Detection Services

Procurement & Logistics Services.

Other Services

Earthing & Lightening Protection Protection |
Close Circuit Television | Pressure Testing | Metering

ICT & Telecommunication

ICT Infrastructure Solutions

We design, deploy, and manage resilient ICT infrastructures, including structured cabling, networking equipment, server systems, and data centers. Whether you're building from the ground up or upgrading existing systems, our solutions are scalable, secure, and aligned with global best practices.

Telecommunication Services

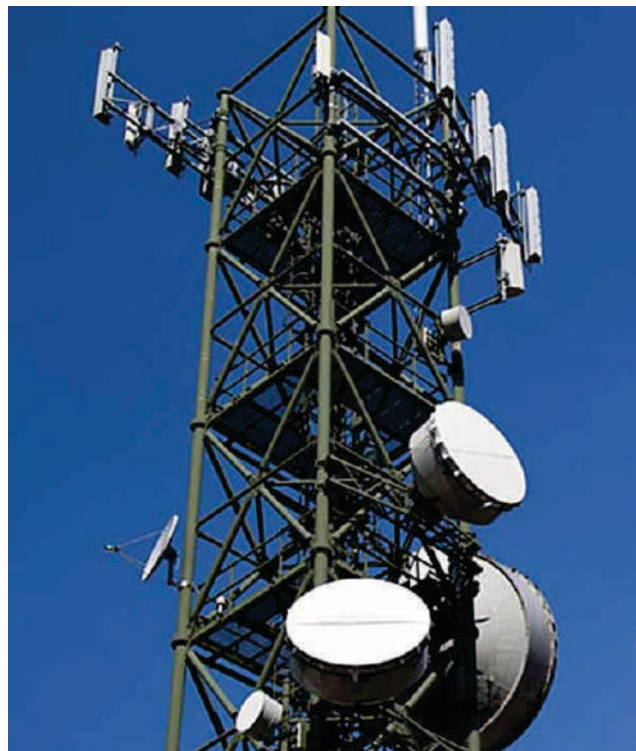

Stay connected with our reliable telecommunication solutions. We offer voice and data services, VoIP systems, unified communications, and mobile integration to ensure seamless communication within and outside your organization.

Access Control Systems

Security is more than just surveillance—it starts with controlling who enters your premises. Our advanced Access Control Systems provide comprehensive entry management using technologies such as:

- + Biometric authentication (fingerprint, facial recognition)
- + RFID card readers and smart cards
- + Mobile access solutions
- + Multi-door and enterprise-level control systems

These systems are integrated with real-time monitoring and reporting tools, enabling administrators to manage access rights, track entry logs, and respond promptly to security breaches.

Instrumentation & Control

We specialize in delivering high-quality Instrumentation & Control (I&C) solutions designed to enhance safety, efficiency, and operational integrity across industrial environments. With deep industry expertise and a commitment to excellence, we provide end-to-end services from system design to field execution and lifecycle support.

Fire & Gas Detection Systems

Protecting lives and assets starts with early detection, and our turnkey Fire & Gas systems are specifically designed for high-risk industrial environments. We offer a complete range of solutions, including fixed and portable gas detectors for flammable, toxic, and oxygen gases; flame and heat detectors; fire alarm control panels (FACP); and seamless integration with SCADA/DCS and ESD systems. Our services cover system design, installation, commissioning, and maintenance, ensuring full compliance with international safety standards such as NFPA, IEC, and EN. Built for reliability, our systems perform effectively even in harsh and hazardous conditions.

Pressure Testing Services

We offer comprehensive pressure testing services to validate the strength, integrity, and leak-tightness of pipelines, vessels, and pressure systems. Our capabilities include hydrostatic and pneumatic testing, pre-commissioning and commissioning support, test pack preparation with complete documentation, and digital pressure recording and reporting. Adhering to safety-compliant procedures based on ASME, API, and ISO standards, our certified technicians and calibrated equipment ensure each test is performed accurately, safely, and with full traceability.

Metering Systems

Precision in measurement is essential for operational efficiency and regulatory compliance, and we specialize in the design, installation, calibration, and maintenance of high-accuracy metering systems. Our expertise covers flow, pressure, and temperature meters; custody transfer and fiscal metering systems; multiphase flow meters; and telemetry with remote monitoring capabilities. All solutions are delivered in compliance with API, AGA, and ISO standards, ensuring metering accuracy across oil, gas, water, and steam applications. By optimizing measurement performance, we help reduce operational losses and enhance overall system reliability.

Static & Rotating Equipment

We deliver comprehensive engineering, installation, and maintenance services for both static and dynamic mechanical systems critical to oil and gas operations. Our capabilities include working with pumps, compressors, turbines, and gearboxes, as well as heat exchangers, separators, filters, and boilers. We offer precision services such as alignment, vibration analysis, and performance testing to ensure optimal functionality. Our preventive and corrective maintenance programs, along with reliable spare parts sourcing and equipment overhauls, are designed to maximize equipment uptime and operational efficiency.

We are committed to delivering innovative, reliable, and sustainable engineering solutions across the electrical and mechanical spectrum. With a focus on quality, safety, and efficiency, we specialize in the design, installation, and maintenance of high-performance systems tailored to meet the needs of residential, commercial, and industrial clients.

Solar Energy Solutions

We provide comprehensive solar power systems designed to help clients reduce both energy costs and carbon footprints. Our services encompass solar PV system design and installation for both off-grid and on-grid applications, detailed solar power audits and consultations, battery storage integration, and reliable operation and maintenance (O&M) services. Each solution is engineered to optimize energy yield and deliver long-term value while minimizing environmental impact.

Earthing & Lightning Protection

Protect your assets, personnel, and equipment with our advanced earthing and lightning protection systems, designed to ensure maximum safety and performance. Our services include the design and implementation of earthing systems, installation of surge protection devices (SPDs), comprehensive risk assessments, and system testing. We strictly adhere to international standards such as IEC and IEEE, ensuring compliance and reliability through global engineering best practices.

Closed-Circuit Television (CCTV)

Enhance your security infrastructure with our intelligent CCTV solutions, tailored to meet the specific needs of commercial complexes, industrial facilities, and residential buildings. Our services include CCTV system design and configuration, deployment of both IP-based and analog surveillance systems, remote monitoring setup and integration, as well as system upgrades and ongoing maintenance. We deliver customized surveillance solutions that provide real-time visibility and effective deterrence.

Why Choose Us?

- + Quality Assurance
- + Turnkey Solutions
- + Experienced Engineers
- + Client-Centric Approach

Electrical Engineering

We deliver specialized mechanical engineering solutions to support the full lifecycle of upstream, midstream, and downstream oil and gas operations. From concept to commissioning, we provide safe, reliable, and cost-effective services designed to meet the highest industry standards and operational demands. Our multidisciplinary team of engineers and field technicians brings deep industry knowledge and proven experience in designing, fabricating, installing, and maintaining critical mechanical systems for the oil and gas sector.

Piping Systems & Pressure Vessels

We provide comprehensive piping and vessel engineering services to ensure safe and efficient fluid transport and containment across industrial applications. Our expertise includes piping design and layout in accordance with ASME B31.3 and B31.8 standards, pipe stress analysis, and material selection tailored to operating conditions. We handle the complete fabrication and installation of piping networks, as well as the design and certification of pressure vessels and storage tanks. Additionally, our services cover flange management, hydrotesting, and commissioning, ensuring system integrity and compliance throughout the project lifecycle.

Mechanical Fabrication & Installation

With a focus on precision and durability, we provide custom mechanical fabrication and on-site installation services tailored to meet demanding industrial requirements. Our offerings include the fabrication of structural supports, skids, and complete mechanical packages, as well as expert welding, machining, and pressure part fabrication. We handle the installation of mechanical systems and process packages, along with site erection, assembly, and mechanical commissioning to ensure seamless integration and reliable performance in the field.

Mechanical Engineering

Our Core Mechanical Engineering Services

Inspection, Testing & Integrity Services

We ensure the mechanical integrity of your assets through comprehensive inspection and testing services designed to maintain safety, reliability, and compliance. Our expertise includes non-destructive testing (NDT), pressure and leak testing, and in-depth mechanical integrity assessments. We also develop and implement risk-based inspection (RBI) programs tailored to operational needs. All services are performed in accordance with international codes and standards such as API, ASME, and ISO, providing you with confidence in asset performance and regulatory compliance.

Maintenance & Shutdown Support

Our team delivers critical support during plant turnarounds, maintenance campaigns, and shutdowns to ensure minimal downtime and maximum efficiency. We provide skilled mechanical manpower, manage equipment overhauls and upgrades, and offer turnkey shutdown planning and execution services. Additionally, we handle spare parts logistics and procurement, ensuring timely availability of essential components to keep operations running smoothly.

Industries We Serve ▼

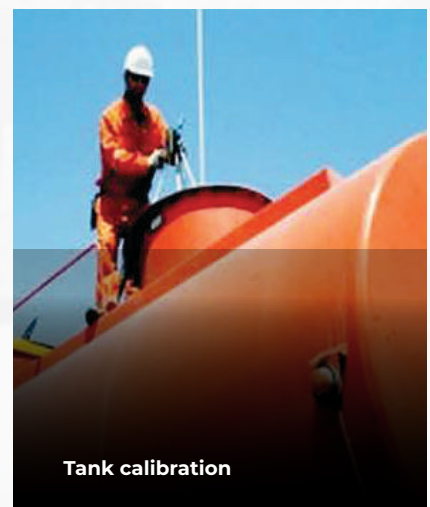

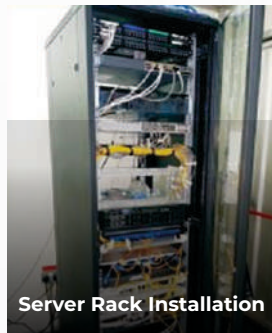

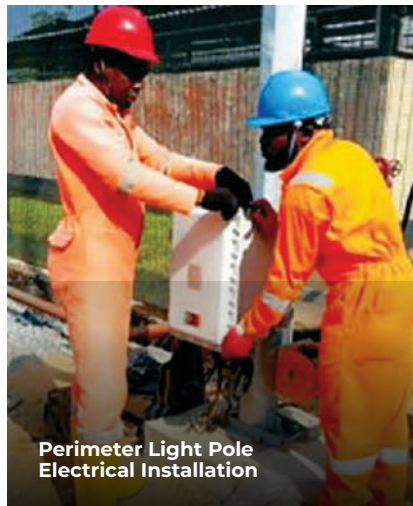

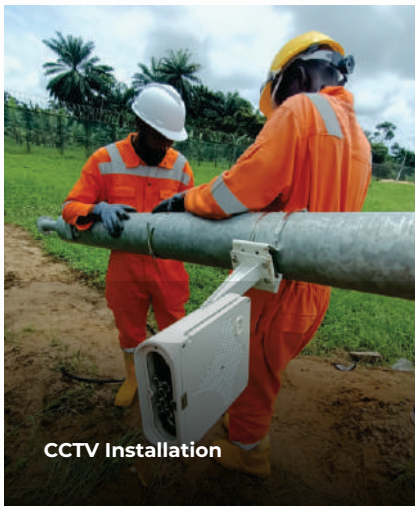

- + Onshore & Offshore Oil & Gas
- + Refineries & Petrochemical Plants
- + LNG & Gas Processing Facilities
- + Terminals & Storage Facilities
- + Power & Utility Infrastructure

Procurement & Logistics

Our integrated procurement and logistics services are designed to support all instrumentation and control project requirements with efficiency and reliability. We handle the sourcing of certified equipment and spare parts, conduct thorough vendor evaluation and inspection, manage customs clearance and freight handling, and coordinate inventory and delivery logistics. Leveraging strategic partnerships with global OEMs, we ensure the timely and cost-effective delivery of high-quality components to project sites, minimizing downtime and reducing logistical risks.

Some of our Projects

Our Clients

We're proud to serve a diverse range of clients whose trust drives our commitment to quality and innovation. Below are some of them:

Our Partners

We are proud to collaborate with a network of trusted partners whose expertise and support enhance our ability to deliver exceptional value. These strategic alliances enable us to provide comprehensive solutions, ensure quality service delivery, and drive innovation across all our operations.

Work History (Excerpts)

Service Provided	Client	Year
Provision of Data Comms & Related Services	SNEPCO	2025
Provision of Technical Data Management(TDM) Services	SNEPCO	2025
Provision of Well Engineering Software & Support Service.	SPDC	2025
Maintenance of CCTV Installations	SPDC	2025
Maintenance of Access Control Installations	SPDC	2025
Asset Perimeter Improvement Project, Nun River.	SPDC	2025
Provision of IDT Deployment at Heritage House	SNG	2025
Provision of Hardware, Software and Ancillary Support Services	NAOC(OANDO)	2025
Provision of ICT Infrastructure Support Services	NNPC OML 18	2025
Provision of Satellite Phones and Maintenance	SPDC/SNEPCO	2025
Provision of CCTV, Paga, Data And Voice System Installations	AGPA/SEPLAT	2022
Procurement & Installation of Enhanced Security & IT/Telecoms	Oilserv/SPDC	2022
Procurement & Installation of IT Telecoms CCTV & WiFi Infrastructure	Oilserv/SPDC	2022
Supply & Installation of 4G Solar CCTV Cameras	Oilserv	2021
Provision of Cleaning Services	SPDC	2021
Computing Infrastructures and Services	SPDC	2021
Provision of Quality Assurance (Inventory Support Services Contract)	SPDC	2020
Provision of Project Management Support Services	SPDC	2019
